

NSA Bethesda Child & Youth Programs

Child Development Centers I & II

Monday-Friday 6 AM-6 PM

CDC I Bldg. 26 PH 301-295-0014

CDC II Bldg. 87 PH 301-400-1200

Child Development Centers (CDCs) provide full-day early care and education (ECE) services for children ages 6 weeks through preschool (or until the child enters kindergarten) in a center-based learning environment.

CDC I and CDC II are accredited from the National Association for the Education of Young Children. The Centers also hold Department of War certification and participate in the USDA Child and Adult Care Food Program for meals serving breakfast, lunch and afternoon snack.

CDC professionals use Early Learning Matters (ELM) curriculum to provide developmentally appropriate activities that nurture children socially, emotionally, physically and intellectually to reach child development milestones and school readiness skills. **WAITING LIST: Apply online at [MilitaryChildCare.com](https://militarychildcare.com).**

Hourly Child Care

Hourly care is available at a rate of \$8.00 per hour with a 2-hour minimum and a maximum of 25 hours per week for children ages 6 weeks-5 years old. Hourly care is open to all with base access and meet eligibility. Hourly care is closed weekends and federal holidays.

Children must be registered in the program to attend. Please call CDC I or II to set up a registration and orientation appointment.

Existing families who have already registered for hourly care can make reservations using CYP Online Services at <https://myffr.navyaims.com/ndwcym.html>. If the desired date/time is not available, please call the local center to be added to the hourly care wait-list, or check the CYP Online Services website periodically for changes in availability.

School Liaison

The School Liaison works to connect commanders, educators, and parents. They serve as subject matter experts for K-12 education issues. The primary function of the School Liaison is support to DoW-eligible families with school-age children to ensure smooth transitions between schools and positive educational experiences. The School Liaison can provide numerous resources to assist families, educators, and commands in their efforts to create positive and supportive educational environments for military children.
